RE: Removal of VAT/Mastic

Dear Mr. Martin,

We appreciate your continued cooperation and current efforts to legally reduce the cost of removing, handling, and disposing of VAT/mastic, friable and non-friable asbestos-containing solid waste materials.

Per past conducted in-house reviews, site inspections, and legally obtained reports and documents, Environmental Protection Division environmental specialists have never observed any visible emissions being generated from the use of the BilMar System as created, designed and presently being used by Mr. William Martin.

Therefore, the removal procedures as described by Mr. Martin and in written documents provided to us by Mr. Martin, are, to the best of my knowledge, legal procedures. Such procedures have also been legally reviewed by authorized, legal representatives (RE: Administrative Law Judge Mark A. Dickerson's Final Decision dated March 24, 1993). Per past conducted legal reviews and evaluations, procedures are legal for removal of VAT/mastic.

Friable and nonfriable asbestos-containing wastes being generated per use of cited procedures, to the best of my knowledge, are being handled, transported, and legally disposed of in accordance to Chapter 391-3-4-.04(8) of the Georgia Solid Waste Management Act. This Act is enforced by Solid Waste Management personnel.

We are currently reviewing in-house complaint handling procedures. We would greatly appreciate your recommendations to eliminate unfairly filed complaints against your companies, as well as other contractors and owners.

Please advise if we can assist you in further reduction of asbestos related costs per employment of legal asbestos procedures.

Sincerely,

Marvin Bradford
Program Manager
Asbestos Licensing & Certification Unit
